

about engines

Peter Leonard Marine hold several prestigious dealerships for marine engines and can supply engines for all sizes of craft from a small 2.5 Mercury outboard motor to commercial engines of 500hp and up. We specialise in re-powering and our re-power deals are often unbeatable! We hold large stocks of spare parts for many engines with many available to purchase online by [clicking here](#).

Our experienced marine engineers and shipwrights can alter and adapt your existing engine beds to take the very latest marine engines. We are the only marine company in Sussex that have dealerships for Yanmar, Mercruiser and Mercury Diesel engines. As we have our own boat lifting equipment in our marina in Newhaven, we can include lift out and relaunch in the price of the new engine installation costs thereby keeping the overall costs down and offer a quick install time.

Part exchange on your existing engine is always an option we are happy to discuss. Please get in contact for a no obligation, friendly chat to discuss your requirements. As the longest established marine company covering Newhaven, Eastbourne and Brighton Marina, our service is never beaten.
