Product short description:

This high output PTC electric space heater is designed to heat enclosed spaces up to 20m² quickly. There are two heat settings and a built-in adjustable capillary thermostat that is easily set using a dial, to maintain the room temperature at the desired level. It is installed with overload safety protection. The heater and stand is made from high-quality steel, and the direction of heat can be angled and easily locked in position. Fitted with a handle for ease of transportation.

- Heat efficiency PTC element
- 2 Heat settings
- Adjustable capillary thermostat
- Overload safety protection
- Heater angle adjustment
