Product short description:

Electronic Timer Sensing 800gph Auto Bilge Pump. Compact electronic sensing bilge pumps that automatically turn the pump impeller every 2 1/2 minutes for approximately 0.5 second. If water is present, the pump will sense resistance, and will continue to run until all water is removed.

SFBP1-G800-13B

No float switch required - the pump senses water automatically without the need for an external switch

Removable strainer and impeller area for easy cleaning

Larger impeller design and more robust motors outperform competitors pumps

Entirely submersible & ignition protected

2 Year Warranty
