**Product short description:**

Seaflo High water bilge alarm which alerts the user to water in the bilge by sounding an audible and visual alarm. The sensor is mounted in the bilge (at the level at which you wish to be alerted) and the head unit is normally mounted near the helm where it is visible and can be heard.

- Head unit is designed to be surface mounted into a panel.
- A 95dB alarm provides a warning that should be audible even in louder environments
- A flashing light on the head unit also provides a visual warning.
- Allows an unmanned compartment to be constantly monitored
- Rated for pumps; 12v 20a & 24v 10a
- Available in either 12v or 24v versions.
