Product short description:

Knitted wind-lined jacket in cotton with water-repellent details

Knitted windproof jacket in cotton. Quilted water-repellent Details with a membrane made of Swedish wool. Two-way zipper and elastic bands at the end. Practical pockets. Regular fit. The jacket has a windproof lining consisting of 96% polyester and 4% elastane. No chemicals are used to achieve the windproof function. Instead, the lining is manufactured with a special weaving technique that makes the fabric extremely tightly woven and therefore also windproof, while the fabric is breathable. The elastane makes the fabric stretchy, which means that it stops the wind but not movement. The fabric is marked with ÖKO-tex® Standard 100, which guarantees that the fabric is free from substances harmful to health.
