Product short description:

The SGL-MD ZD77KIT Zinc Hull Anode is an essential safeguard for your boat, ensuring long-lasting protection against corrosion in saltwater environments. Engineered from high-quality zinc, this anode is designed to prolong the life of your vessel's hull, making it an indispensable component for marine maintenance. Easy to install and maintain, it provides reliable performance and peace of mind for every boat owner.

- Premium-grade zinc for superior corrosion resistance
- Designed for optimal protection in saltwater conditions
- Easy installation and low maintenance
- Enhances the longevity of your vessel's hull
- Ideal for a variety of boat types and sizes
