Product short description:

09-810B-1 Johnson water pump impeller is a vital component designed to ensure optimal performance of your boat's cooling system. Crafted for reliability and efficiency, this impeller provides the necessary water flow to keep your engine running smoothly, preventing overheating during your adventures on the water.

- Durable construction for long-lasting performance
- Designed for easy installation and compatibility with various Johnson models
- Enhances engine cooling efficiency for peak performance
- Suitable for freshwater and saltwater applications
- Essential for maintaining overall boat safety and reliability
